Dear Ms. Grantham:

This letter is to describe the details of the sampling episode to be conducted at the Bully Camp Central Tank Battery produced water disposal facility on Monday May 11, 1992. The sampling will be performed by myself and Susan Roman of SAIC. We will be accompanied by Ryan Childs of EPA and Kerry St. Pe of the Louisiana DEQ. I would like to emphasize that the purpose of this sampling effort is to characterize produced water prior to its disposal plus associated waste solids, and that the data will not be used for any enforcement purposes.

The sample team will arrive between 8:00 and 9:00 am and will remain on-site for approximately 9 to 10 hours. Samples of the produced water will be collected upstream and downstream of the sock filter. These samples will consist of hourly aliquots composited over two four-hour periods for a total of two samples over eight hours. Two grab samples of solids will also be collected. One solids sample will be obtained from the sock filter. A sample of produced sand will be obtained from the bottom of one of the produced water storage tanks. In addition, a used sock filter will be obtained in its entirety. Details of the sampling procedures and the laboratory analyses to be performed are included in the enclosed report titled "Sampling Plan for Production Operations in the Coastal Oil & Gas Industry."

Your cooperation in this sampling effort is greatly appreciated. If you have any questions, please do not hesitate to call me at 703-556-7318.

Sincerely,

A handwritten signature in cursive script that reads "John B. Sunda". The signature is written in dark ink on a white background.

John B. Sunda
